**EDUCATION**

**FPT Polytechnic College**                                                                 09/2022 – Present
Software Development (Java)
- GPA: 9.2/10
- Top Outstanding Student in multiple terms

**Ton Duc Thang University**                                                                 10/2020 – 03/2022
Mechatronics Engineering

---

**CERTIFICATES**

**Hospital Data Analytics | 2024**
FPT Polytechnic Workshop

**Java Web Application Development | 2024**
FPT Polytechnic Workshop

**Spring Boot & Angular Development | 2024**
Udemy

**ReactJS Tutorial | 2024**
Great Learning

---

**WORK EXPERIENCE**

**Metech Technology Co., Ltd.**                                                             08/2024 – Present
Frontend Developer Intern

- Built user interfaces with ReactJS, ensuring responsiveness and smooth user experience.
- Optimized performance and improved load times by refining code logic.
- Integrated APIs to manage and manipulate data between front-end and back-end.

---

**SKILLS**

**Technical Skills:**
- Languages & Frameworks: Java, SpringBoot, Spring MVC, MySQL, SQL Server, PostgreSQL, AngularJS, ReactJS, RestFul APIs
- Tools: VS Code, JetBrains, XAMpp, Eclipse, CodeIUM, Git, GitHub

**Soft Skills:**
- Self-learning, teamwork, independent work, handling pressure, and adapting to new technologies

---

**PROJECTS**

**Typing App**                                                                                            11/2024
- **Team Size:** 1
- **Repository:** Github Repository
- **Demo:** Github Page
- **Description:** This app measures typing speed, tracks typing history, and displays progress through visual charts based on typing records.
- **My Role:** Developed the application independently using React and TypeScript. Integrated libraries such as Ant Design for UI components, Recharts for data visualization, and Confetti for interactive effects.
- **Technologies Used:** React, TypeScript, Ant Design, Recharts, Confetti,...

**PROJECTS**

### Weather App                                                                10/2024

- **Team Size:** 1
- **Repository:** Github Repository
- **Demo:** Github Page
- **Description:** A simple weather app that uses the OpenWeatherMap API to show current weather and allows users to search for other locations.

- **My Role:** Developed the app independently with React and TypeScript, using Ant Design for the user interface and Axios for API requests.

- **Technologies Used:** React, TypeScript, Ant Design, Axios

### Freelancer Platform                                                        9/2024 – 10/2024

- **Team Size:** 5
- **Repository:** Github Repository
- **Description:** The platform enables clients to find freelancers for various projects and allows freelancers to search for job opportunities.

- **My Role:** Fullstack developer, responsible for developing specific APIs, training a chatbot with DialogFlow, building the frontend interface with React, and making API calls with Axios.
- **Technologies Used:** SpringBoot, Restful APIs, ORM, JPA , MySQL, ReactJS, DialogFlow, Axios

### Food Services                                                              9/2024 – 10/2024

- **Team Size:** 3
- **Demo:** Youtube Demo
- **Description:** Built with a Java backend and ReactJS frontend, the platform enables clients to find and order from various food service providers.

- **My Role:** Frontend developer, responsible for developing the interface with ReactJS based on Figma mockups, implementing UI components, and making API calls.
- **Technologies Used:** ReactJS, I18N, Axios, Antd,...

### Restaurant Managament                                                      11/2023 – 5/2024

- **Team Size:** 6
- **Demo:** Youtube Demo
- **Description:** Built with Java Swing for the frontend and SQL Server with JDBC for the backend, this platform provides full functionality for managing a restaurant.
- **My Role:** Fullstack developer, responsible for database connections, writing SQL queries, and developing the user interface.
- **Technologies Used:** Java Swing, SQL Server, JDBC
